

A close-up, high-contrast photograph of human skin. The lighting is dramatic, creating deep shadows and bright highlights that emphasize the texture and contours of the skin. The overall color palette is dark, ranging from deep blues to blacks, with some lighter, almost white highlights where the light catches the skin's surface.

SKINMEDIX

TREATMENTS

SKIN & LASER

CONSULTATIONS & SKIN ANALYSIS

Our main focus is to provide you with the safest and most efficacious treatment plan possible, which is why every treatment journey begins with a comprehensive consultation. Our professional therapists will analyse your skin using the OBSERV 520, a state of the art skin analysing system equipped with six comprehensive observation modes to view and analyse skin health from the deepest layer right through to the surface. OBSERV 520 captures full face, clearly defined skin images which bring to light any problems that may reside deeper within the skin and allows us to create an effective treatment plan to deliver optimal results and assess contraindications to ensure your safety. These before and after photos, with impressive side by side comparisons, allow for effective treatment progress tracking. We can also offer advice on how best to maintain your results outside of our in-house treatments. Feel free to ask our experienced professionals any and all questions, so you leave your consultation feeling completely comfortable and confident with your new treatment plan.

CONSULTATION/SKIN ANALYSIS **\$75**

Redeemable with the purchase of any treatment or product

LASER CONSULTATION **\$60**

This service includes a treatment test patch, which for your safety must be performed prior to the commencement of any laser treatment, with no exceptions

LASER GENESIS

Laser Genesis is an advanced, non-invasive form of laser technology, designed to safely and effectively rejuvenate the skin from the inside out. It works by gently heating the upper dermis well below the skins

surface to stimulate collagen and elastin production.

Laser Genesis is effective in treating a wide variety of skin conditions such as diffuse facial redness, rosacea, unwanted brown spots, acne and acne scarring. It can also improve the appearance of enlarged pores, fine lines and wrinkles, skin tone and texture, and other noticeable signs of ageing.

This amazing treatment is not limited to just the face but can be performed all over the body including neck and décolletage. Laser Genesis is a gentle treatment that can be performed on almost everybody and involves little-to-no downtime, meaning you can return to your daily activities immediately. The treatment itself is very comfortable, in fact most people find it to be quite relaxing. A subtle and natural difference will be apparent after one treatment of Laser Genesis, but a series of six treatments is recommended for best results. Each session of Laser Genesis (excluding spot treatment) includes a gentle, low level clinical peel and LED light therapy to maximise the results.

EXCEL V

The Cutera Excel V is a state of the art laser that uses the application of multiple wavelengths to target different layers of skin in order to treat a wide variety of aesthetic skin concerns. This system can safely and effectively treat superficial and deep vascular skin conditions such as Rosacea, Telangiectasia, spider veins, red and blue facial veins and leg veins, as well as benign epidermal pigmented lesions caused by sun damage. The systems integrated sapphire contact cooling makes for superior patient safety and comfort throughout the entire treatment. The number of recommended treatment sessions will be assessed during the initial consultation; we are happy to design cost-effective individual treatment programs.

LASER HAIR REMOVAL

The Cutera Excel V system provides a superior hair removal solution for all skin types. The advanced technology and integrated sapphire contact cooling makes for a safe, comfortable and effective treatment.

It works by using a proven long pulse laser which targets melanin in the hair; denaturing the hair follicle to inhibit future growth.

Multiple treatments at regular intervals are recommended for the best results, as not all of the hair can be targeted in a single session, due to the hair growth cycle. Cost effective treatment packages are available for all Laser Hair Removal treatments

CLINICAL PEELS

Clinical peeling is a gentle but effective method of stimulating the cells and encouraging our skin to perform how it is supposed to, think of this as a workout for your skin.

We use a variety of different skin peels containing different ingredients to target all layers of the skin, the peel we choose is tailored to address your specific concerns and different skin conditions. Skin peels can be used to target concerns such as ageing, fine lines and wrinkles, sun damage, pigmentation, dullness, acne, redness and loss of elasticity.

Skin peels increase the natural exfoliation of the cells, stimulate collagen and elastic production and encourage skin resurfacing, to improve the overall appearance of your skin. Clinical skin peeling is a quick, safe and painless procedure, is a quick treatment that doesn't involve any downtime. Perfect for time poor clients, these treatments are often referred to as 'lunch time peels'.

Most effective when delivered as a package, 4 or 6 treatments every 2 weeks. Not just a workout, but a boot camp for your skin!

LED LIGHT THERAPY

LED light therapy is a non-invasive and painless treatment that is beneficial for every skin type and condition. High powered Light Emitting Diodes (LEDs) are used at varying wavelengths of light energy and work by stimulating the skins natural cellular activity and boosting the cells energy level in order for the cells to work faster and more efficiently. A wide range of conditions can be treated such as acne, sun damage and ageing, as well as stimulate collagen production, speed up the skins natural wound healing response and assist in calming redness and inflammation. There is no downtime involved, in fact LED light therapy is often used as a post treatment solution after intense treatments.

LED PROGRAM OF 10	\$600

BEAUTY SERVICES

BROWS & LASHES

We only use the best quality products to enhance and define your brows and lashes to give a beautiful and natural finish. Our team members are highly skilled with a real eye for the artistry involved with these services. We follow the Brow Artists International Natural Brow Restoration and Design System. Our popular lash lift service is a fantastic alternative to lash extensions which can damage the natural lashes. Lash lift instantly elevates your natural lashes to give the illusion of length and volume and enhance your eyes for 6-8 weeks. For optimal results this treatment is best used in conjunction with our lash growth system [EyEnvy](#).
